

Everpure Combo-4FCS-CN Commercial Water Purifier

Provide high-quality drinking water for steam and combi ovens, beverage dispensers, or back-end kitchen equipment.

Model

SA31216: Everpure Combo-4FCS-CN Commercial Water Purifier

Application

Beverage dispensers, steam and combi ovens, kitchen equipment

Advantages and Features

- Intercepts particles larger than 0.5 microns in water, effectively filters residual chlorine, and efficiently absorbs organic compounds in the water, such as chloroform, carbon tetrachloride, and volatile phenols
- Uses imported anti-scaling materials and an upgraded anti-scaling formula to eliminate "milky water" issues
- Features a quick-disconnect metal shell filter cartridge with strong pressure resistance, high reliability, and easy replacement
- Compact structure and easy installation
- Comes with a standard stainless steel faucet to ensure the hygiene and safety of every drop of water

Everpure Combo-4FCS-CN
Commercial Water Purifier

(The system comes with a standard stainless steel faucet.)

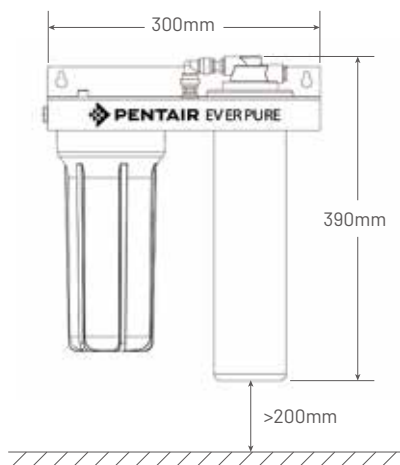

Installation Tips

- Install using municipal water that meets national standards as the water source
- Choose a load-bearing wall that can support the weight of the system for installation
- Install the filter cartridges vertically and ensure the system is mounted vertically
- Ensure there is at least 200mm of space below the filter cartridges to facilitate easy replacement
- When rinsing the filter cartridges, flush the system for 30 minutes using water at the maximum flow rate

Operational Tips

- Recommended filter cartridge lifespan: Pre-filter: 3-6 months; Main filter: 6-12 months
- Replace the filter cartridges when the filter capacity is saturated or the flow rate decreases
- After each installation or replacement of the filter cartridges, they must be rinsed and activated before normal use
- When not in use for extended periods, drain the remaining water from the pipes and close the water supply. When using the system again, open the water inlet valve and flush the filter cartridges with water at the maximum flow rate for at least 30 minutes
- The suggested replacement period is a recommendation; the actual lifespan of the filter cartridges may vary based on actual water usage conditions and local tap water quality

List of Included Materials

Product Specifications

System Name	Everpure Combo-4FCS-CN Commercial Water Purifier
System Material Number	SA31216
Main Filter Cartridge Material Name	Everpure 4FCS-CN Integrated Activated Carbon Fibre Filter Cartridge
Main Filter Cartridge Material Number	SA21060
Water Purification Flow Rate (L/min) - Under MOH certification conditions	4
Rated Total Water Purification Capacity (L) - Under MOH certification conditions	10,000
Residual Chlorine Treatment Flow Rate (L/min)	7.57
Residual Chlorine Treatment Capacity (L)	56,781
Filtration Precision (µm)	0.5
Dimensions (cm)	30(W)×39(H)×13(D)
Inlet/Outlet Pipe Diameter (inch)	3/8
Pressure Requirement (MPa)	0.14~0.35
Applicable Temperature (°C)	5~38
Gross Weight/Net Weight (kg)	4kg/3kg

Warranty

- A one-year warranty period is provided from the date of purchase. The limited warranty covers non-human defects in the product and applies only to the original purchaser and installer. The manufacturer is not responsible for any damage caused by human error.

Caution

- The contaminants or other substances removed by this water filtration system are undesirable substances present in the water. Do not use microbiologically contaminated water or water that has not been adequately disinfected and lacks quality assurance, either before or after the system.
